WHAT IS CLAIMED IS:

1. A synthesized glycopeptide that does not occur naturally, the glycopeptide being represented by the following chemical formula (1): [Chemical Formula 1]

$$NH_{2} = \begin{bmatrix} L_{1} \\ I \\ SUG \end{bmatrix}^{m} (Val-Pro-Gly-X-Gly)_{n} - L_{2}-SUG$$
 (1)

(where x is any amino acid residue, L_1 and L_2 are linkers, SUGs are sugar chains, m is 0 or 1 and n is an integer from 1 to 10, and L_1 and L_2 may be identical with or different from each other and SUGs may be identical with or different from each other).

- 2. The glycopeptide according to claim 1, wherein SUGs in the formula (1) are sugar chains of monosaccharide or oligosaccharide.
- 3. The glycopeptide according to claim 1 or 2, wherein x in the formula (1) is Val.
- 4. The glycopeptide according to any of claims 1 to 3, wherein m in the formula (1) is 0.
- 5. A temperature-responsive micelle composed of the glycopeptide according to any of claims 1 to 4.
